Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 October 2009.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Amendment/Arguments

1. The Examiner has carefully considered Applicant's amendments to the claims and accompanying remarks dated 10/16/2009. Applicant's amendment to overcome the objection made over "characterized in" is sufficient to overcome this objection which is now withdrawn. With regard to the substantial rejection of deleting "part" and adding "some" to the claims, these amendments have been entered but do not have support from the specification and thus Applicant's arguments are not commensurate in scope. Applicant has directed the office that the aforesaid amendment has support by the drawings of the application as described in the specification disclosure. That is insufficient, as Applicant needs to point to exactly where the support is found. Upon rereading the entire specification and thoroughly looking at the drawings and their description the Examiner concludes that what applicant is currently trying to claim does not have support. This shall be explained further in the 112 rejection. The previously applied rejection is being withdrawn as they do not read on the amended claims, However since the amendment does not have support a 112-1st rejection has been set forth below.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has amended the claims to appear that the textile is coated on one side with a resin and at least some of the single yarns are surrounded by the resin and some of the same single yarns are not surrounded by the resin. Applicant has directed the office to the drawings and disclosure but no where specifically as to where this amendment has support for. Applicant has pointed to drawings, where the Examiner in Figures 3 and 4 both show that the upper parts of the single yarns are coated with a resin and the lower part of the same yarn is not coated. this does have support, but the new language of picking and choosing yarns on the same side to be coated and not coated does not have support and this neither the drawings nor the description of the drawings describe what the amendment reflects. In fact that paragraph discloses that both coating are found on the same side but just not penetrating all the way through. Thus, the currently amended claims do not have clear and concise support from the current specification. If the Examiner is incorrect in her deduction please point out the sentences within the paragraph where there is support for the current amendments.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
